## Press Release

### KWC ONO – superior style

KWC ONO lever mixer in the bathroom

Unmistakable: the slender lever made from hardened stainless steel for uniquely precise control.

#### **Multi-award-winning design.**

The KWC ONO is practical yet elegant. The multi-award-winning line of faucets in a no-nonsense design was developed for a demanding clientèle, who want a simple look, a timeless design and lasting functionality. The authentic lines and intelligent functions make a bold statement in both the bathroom and the kitchen: whoever lives here has style.

#### **KWC ONO in the bathroom**

The characteristic steel made from the finest yet strongest stainless steel moves in a sealed link. The way it moves is so innovative and agile that no joints or soiled edges can occur.

- Wide variety of faucets for all wash basin solutions.
- The technical highlight is the diverter integrated in front of the spray hose: a single pull on the diverter switches between the bath-filling and shower functions.
- Rotatable bath spout.
- Consistently and holistically designed faucet series.

The KWC ONO range includes side-operated, elegant lever mixers with a swivelling faucet, which provide a large operating range and guarantee ergonomic operation as well as a consistent design.

## **KWC ONO in the kitchen**

The KWC ONO waits on kitchen users with an entire selection of design delicacies and intelligent optional extras. A particular highlight is the patented highflex® technology: this flexible spring hose can move in all directions, returns automatically to its starting position and has a superior look even when not in use.

- Five chrome-plated kitchen models, three models in stainless steel and two models for semi-professional use.
- Three side-operated designs, elegantly curved versions with seamlessly integrated Neoperl pull-outs, two models with high, horizontal spout.
- Flexible use at the sink/food preparation hub with a large operating range.
- All models feature a pull-out spray or Neoperl pull-out as well as a hose that can be extended to 70 cm.

The KWC ONO highflex® is a semi-professional faucet with extraordinary features. The innovative hose technology opens up a new dimension in flexible water usage in demanding and functional kitchens.

#### **KWC Group Ltd.**

**KWC Group Ltd. is an international premium manufacturer of taps and comprehensive sanitary solutions.
